

John Hezekiel Malatag

Algorithm

- 1. Start
- 2. Initialize a list of friends.
- 3. Display the current friends list in one line.
- 4. Ask the user to choose **add** or **remove**.
- 5. If choice is add: the user will input name.
- 6. If choice is remove: the user will remove a name on the list.
- 7. Display the updated list of friends.
- 8. End.
